GOVERNMENT OF IRELAND POSTGRADUATE SCHOLARSHIP PROGRAMME 2020

ENVIRONMENTAL PROTECTION AGENCY POSTGRADUATE SCHOLARSHIP

THEME INFORMATION
1. **BACKGROUND**

In partnership with the Irish Research Council, the Environmental Protection Agency (EPA) invites applications for an Environmental Protection Agency Postgraduate Scholarship, hereinafter referred to as an EPA Postgraduate Scholarship.

While applicants may apply for one scholarship theme only, those who choose to apply for a strategic funding partner scholarship will also be considered for a Government of Ireland Postgraduate Scholarship.

The EPA is an independent public body established in July 1993 under the Environmental Protection Agency Act, 1992. The EPA Research Programme is a Government of Ireland initiative funded by the Department of Communications, Climate Action and Environment (DCCAE). The EPA is a statutory body responsible for protecting the environment in Ireland and ensuring that development is sustainable. It regulates and polices activities that might otherwise cause pollution and ensures that there is solid evidence on environmental trends so that necessary actions can be taken. The EPA has the role of coordinating environmental research in Ireland and supports R&D activities (mainly via its Annual Competitive Research Calls) in a range of environmental areas. The EPA Research Programme aims to identify pressures, inform policy and develop solutions.

2. **ENVIRONMENTAL RESEARCH PROGRAMME 2014–2020**

The EPA *Research Strategy 2014–2020* is based around three pillars (climate, water and sustainability), representing the key research priorities associated with delivering a protected Irish environment.

3. **ENVIRONMENTAL PROTECTION AGENCY POSTGRADUATE SCHOLARSHIP**

The EPA Research Programme has a strong focus on policy and is driven by national regulations and European directives. Where appropriate, applicants are being encouraged to consider how best to integrate the use of Earth Observation (e.g. COPERNICUS) to address their selected research question.

a. **Climate research**

Proposals are invited for innovative research to provide the evidence to support environmental policy in Ireland. It is critical that applicants clearly demonstrate the relevance of their proposed research to the:

- *EPA Research Strategy 2014–2020*;
- national environmental policy context;
- implementation of the UN Sustainable Development Goals.
Research proposals are invited which would lead to scholarships under the following areas:

- **Theme 1: Carbon stocks, GHG emissions, sinks and management options**;
- **Theme 2: Ireland’s future climate, its Impacts, and adaptation options**;
- **Theme 3: Climate solutions, transition management and opportunities**;
- **Theme 4: Air science**.

b. **Water research**

Proposals are invited for innovative research to provide the evidence to support environmental policy in Ireland. It is critical that applicants clearly demonstrate the relevance of their proposed research to the:

- *EPA Research Strategy 2014–2020*;
- national environmental policy context;
- implementation of the UN Sustainable Development Goals.

Research proposals are invited which would lead to scholarships under the following areas:

- **Theme 1: Safe water**;
- **Theme 2: Ecosystem services and sustainability**;
- **Theme 3: Innovative water technologies**;
- **Theme 4: Understanding, managing and conserving our water resources**;
- **Theme 5: Emerging and cross-cutting issues**.

c. **Sustainability research**

Proposals are invited for innovative research to provide the evidence to support environmental policy in Ireland. It is critical that applicants clearly demonstrate the relevance of their proposed research to the:

- *EPA Research Strategy 2014–2020*;
- national environmental policy context;
- implementation of the UN Sustainable Development Goals.

Research proposals are invited which would lead to scholarships under the following areas:

- **Theme 1: Resource efficiency**;
- **Theme 2: Health & wellbeing**; including radiation protection;
- **Theme 3: Natural capital and ecosystem services including soils and biodiversity**;
- **Theme 4: Socio-economic aspects of a sustainable environment**.
