

2021
Government of Ireland Postgraduate Scholarship Programme
Frequently Asked Questions

New questions are marked ****New****
Updated questions are marked ****Updated****

Similar questions have been grouped under the following headings:

- 1. Eligibility**
- 2. Applying to the programme**
- 3. Conditions of award**

1. Eligibility Quiz

What are the necessary steps in order to Successfully complete and submit the Eligibility Quiz, and progress to the Application form.

Applicants must, in one go:

- **'Submit'** the Eligibility Quiz and meet the Eligibility Requirements as per Call Documentation
- Click on **'Continue to Application'**
- **DO NOT CLOSE THE WINDOW**
- Once the application form opens, complete the field Irish Research Body
- Click on **'Save Draft'** to save the Application and be allowed to edit later.

Applicants should only leave the page once the draft application has been successfully saved.

An Eligibility Quiz can only be submitted once. Multiple attempts will block applicants from completing the Application form.

Does the Eligibility Quiz require the inclusion of project information including project title, abstract and key words?

Does this mean that the project information on the GOI Postgraduate form itself can differ from the project information on the eligibility quiz?

Will the applicants be able to update/improve the project information when they are submitting the actual application form? Or, on the actual application, are they obliged to submit the exact same project information (word-for-word) that they entered on their eligibility quiz?

Yes, applicants must submit tentative project information as part of the eligibility quiz. Once the eligibility quiz has been submitted applicants will not be able to revise or edit the tentative project information.

The tentative project information (project title, abstract, keywords, etc.) fields must be completed as part of the Application and as part of the Eligibility Quiz. Where possible, the Council kindly asks applicants for this information **not** to differ. Slight changes will be accepted, but major differences between the tentative project information in the Eligibility Quiz and the Application form may compromise the assessment process of your application.

An applicant put the name of their supervisor into their eligibility quiz and saved. However, the supervisor's name is spelled differently in the supervisor drop-down menu of the actual application. Will the IRC reject this application due to the fact that the supervisor's names slightly differ on the eligibility quiz and the main application?

The Primary Supervisor Name must match the supervisor's name as **registered in the online system**. Please contact your Primary Supervisor to confirm this information.

Only list the name of your Primary Supervisor. An Eligibility Quiz with two or more Supervisors listed will be deemed INELIGIBLE.

2. Eligibility

Would a publication-based thesis be eligible for funding under the IRC GOI call?

According to the T&Cs, "Professional doctorates are not excluded from the consideration of a structured PhD definition". Does the same apply for master's programmes? Would a professional master's programme fall under the category of a structured research master's programme and be eligible for up to 2 years of funding?

Where a scholar is on a structured degree programme, the office of the vice president/dean of research will be required to confirm that the programme includes the development of discipline-specific knowledge, research and transferable skills in line with the national definition of a structured research programme as outlined in Appendix II, page 20. If this type of PhD is endorsed by the HEI, it is eligible.

What is the status of UK applicants this year? Should they answer 'yes' or 'no' to: are you a national of a European Union member state?

While the UK is no longer a member of the EU, there is now a transition period, concluding on 31st December 2020, and during this time, the UK is treated as if it is a member state of the EU, with all EU Directives and access to EU continuing as before. Therefore, for the purpose of the 2021 GOIPG call UK applicants will be considered EU nationals.

In answering the question 'Have you previously submitted all or part of this proposal to an Irish Research Council scheme and been unsuccessful?'

Should a prospective applicant answer yes or no if the applicant previously submitted:

- the same proposal but declined the offer of an award;
- another proposal but were unsuccessful
- an unrelated proposal hosted at a different institution
- all or part of this proposal and were unsuccessful.

The question '*Have you previously submitted all or part of this proposal to an Irish Research Council scheme and been unsuccessful?*' focuses on the content of the proposal for assessment purposes rather than applicant's eligibility and/or the outcome of applications from previous years.

Therefore, when answering that question, prospective applicants should focus on whether **all or part of the proposal being submitted is a resubmission.**

Applicants can use the free text box to include any additional information including information relating to previous submissions and/or any of the above-mentioned scenarios.

As per the Terms and Conditions, applicants ‘must have a first class or upper second-class honours bachelor’s, or the equivalent, degree’. Is an applicant with a first-class honours Higher Diploma eligible?

&

Is a Postgraduate Diploma (first class honours) equivalent to a BA? A potential applicant is in their final (4th) year of a BA who completed the Grad Diploma, which is a level 9 qualification. Are they eligible to apply for GOIPG?

As per the [QQI National Framework of qualifications \(NFQ\)](#), a Higher Diploma is a level 8 qualification, equivalent to an Honours Bachelor Degree, and a Postgraduate Diploma a level 9 qualification, equivalent to a Master’s degree. Irish HEIs and HE/Research bodies are expected to be guided by QQI and NFQ in terms of the recognition and equivalence of a degree. Therefore, an applicant with a first class or upper second-class honours Higher Diploma or with a Postgraduate Diploma are eligible to apply.

Where an applicant completes a 2-year research masters and transfers into year 3 of a PhD, is that applicant eligible to apply for funding for one-year (their final year) of doctoral studies?

An applicant who successfully transfers from a 2-year research masters into year 3 of a PhD can apply for one-year of funding for the final year of their PhD.

The scheme information states that an applicant cannot have previously held a Council scholarship for the project. A student has previously been awarded a Government of Ireland International Education Scholarship (through the HEA). Can they still apply for the IRC GOI?

The HEA Government of Ireland International Education Scholarship is not an Irish Research Council scheme. The applicant is still eligible to apply for the Government of Ireland Postgraduate scholarship provided double funding of a project does not occur.

Is there any age limit for applicants to be eligible for fully funded Irish Research Council scholarship?

No, the Council supports excellent researchers across all career stages.

Is it possible to apply without English language certificate, for example IELTS, TOEFL, CAE?

The English language requirements for your degree/course are determined by the Irish higher education institution in which you will be enrolled for the research masters or PhD.

Is the programme open to students from anywhere in the world?

Yes. See Clause 2 of Appendix II the Terms and Conditions. There are two categories of applicant, defined by nationality/residency.

While the majority of scholarships will be awarded to applicants who fall under Category One, a proportion of scholarships will also be made to exceptional applicants who fall under Category Two. The number of awards that can be made to this category of applicant is small in comparison to the typical number of eligible applications in this category.

In 2020, the success rates for the programme were as follows:

	Overall success rate ¹	Success rate for Category Two applicants ²
STEM	18%	5.3%
AHSS	18%	8.5%

¹All awards as a percentage of all eligible applications

²Category Two awards as a percentage of Category Two eligible applications

A candidate (recent graduate) with a 2.2 but extensive experience as well as a postgraduate diploma has expressed a willingness to apply. The candidate had extenuating circumstances with regards to the undergraduate degree result. Are there any grounds whereby the IRC will accept applications from recent graduates who have not met the 2.2 cut-off?

All applicants must have a first class or upper second-class honours bachelor's, or the equivalent, degree. If undergraduate examination results are not known at the time of application, the Council may make a provisional offer of a scholarship on condition that the scholar's bachelor's, or the equivalent, degree result is a first class or upper second-class honours. If a scholar does not have a first class or upper second-class honours bachelor's, or the equivalent, degree, they must possess a master's degree. The Council's determination of an applicant's eligibility on these criteria is final.

Are there any restrictions in terms of eligibility for applicants already in receipt of funding for their PhD? If so, what types of awards will render an applicant ineligible? Are researchers whose PhD is being funded through a larger grant (not in their own name, national or international) eligible to apply?

Can a person who has already begun a PhD under another funding mechanism, or who has previously held funding, apply to the GOI postgraduate scheme?

Applicants may apply to the scheme if they are in receipt of other funding. However, if successful, a scholar will not be eligible to hold a Council scholarship if **during the funding term** they are in receipt of another bursary or scholarship or a combination of other bursaries or scholarships with a total value greater than €16,000 per annum. This €16,000 limit per annum is inclusive of stipend, fees and research expenses. Scholars must inform the Council about the amount and source of any awards or bursaries obtained before or during the funding term. This information must also be recorded in the appropriate progress reports.

Is an applicant who already holds a PhD eligible to apply to carry out a second PhD or a Research Masters?

An applicant who already holds a PhD is eligible to apply to GOIPG, so long as they meet all other eligibility criteria.

The Terms and Conditions indicate the earliest start dates allowed in the case of a research degree that is already in progress. Are PhD researchers who are doing their degree part-time

eligible to apply, if they are planning to start conducting their research full time? If they are, is it permissible to have an earlier start date than what is indicated in the call document, given the part-time nature of their research to date?

For applicants who have already completed part of the degree for which they are seeking Council funding, the duration of funding to be awarded will be dependent on the type of degree being pursued and the date of first registration as detailed in the table on page 18 and 19 of the [Terms and Conditions](#). The duration of funding to be awarded will be calculated based on when the applicant first registered for their postgraduate degree, regardless of whether they registered as a part-time or full-time student. If successful in the competition, the applicant will be expected to register as a full-time student.

3. Applying to the programme

The application requests the ‘graduation date’ for BA, MA, etc. Can you advise if this date should be the date on the transcript (e.g. November 2019) or the date the graduation ceremony took place (e.g. March 2020)?

Where the degree has already been completed the date should be the date on either the transcript or certificate. Variation occurs between HEIs when issuing transcripts and certificates.

As a rule the date submitted to the relevant field in the application form should be that on the transcript or certificate issuing the applicant’s final results. The same transcript or certificate must be provided in the event an applicant receives a conditional offer of funding.

If the degree is not yet completed, the *expected* date of completion should be reflected in the field on the application

A potential applicant wishes to apply for a structured PhD award. Due to Covid-19 their professional doctorate commencement was postponed by six months and therefore, commenced in Sept 2020. As such can you please advise, if this applicant can apply for 3 years of funding due to the delay in commencement, or will their registration date (Jan 2020) be used in order to calculate potential award duration?

Where an applicant has already registered on a PhD programme the date of first registration will determine the duration of funding to be sought.

An applicant does not have a grade summarizing their three years of study, what should they enter in the application?

Applicants must enter the overall degree results exactly as they appear on the transcript. If official transcripts do not confirm the applicant’s overall result and date of award **exactly** as detailed in the application, any conditional offer of a scholarship will be withdrawn. If the overall result is not clearly written on the transcript, they can enter “No overall result written on transcript, see comments for an outline of results”. In the descriptive section, they can enter a summary of their results (which must match exactly): e.g. 36 modules taken, A+ (30 modules) B+ (two modules), B (two modules) PASS/FAIL (two modules). Some grading systems have other versions, such as: Very Good (30 modules), Good (four modules), Quite Good (two modules).

Should the applicant be registered in a postgraduate course at an eligible HEI before applying for the scholarship? If there is no need to be registered, how can my Primary Supervisor provide a form telling how much he/she knows about me?

Although applicants do not have to be a registered/enrolled student at an eligible HEI before applying for the scholarship, the Council strongly advises applicants to contact both the Research Office and the Primary Supervisor in the eligible HEI well in advance of starting the completion of a GOIPG application.

Can a current PhD student who applied twice previously (and unsuccessfully) for GOIPG with another HEI, apply again with a different HEI?

Applicants may only unsuccessfully apply twice to GOIPG, regardless of the institutions they are applying from. In this instance, the applicant is not eligible to apply. However, they may apply twice to any of the postgraduate enterprise schemes (EPS PG or EBP) in addition to GOIPG.

What stipulations are in place with regard to the use of figures, images, and tables when applying for the GOIPG 2021? I see that there is space for an attachment; can attachments include these (and references), and if so, what is the page/size limit?

If applicants have supplementary information, e.g. diagrams or a bibliography, which accompany your research proposal, they may upload it in PDF format. Supplementary material should **ONLY** include **essential information required for the interpretation and understanding of the proposed research**. Applications will be deemed ineligible and will not be considered for funding if they include additional information about the research proposal or applicant.

Can a supervisor support more than one application, either as primary, secondary or both?

Yes, a supervisor may support more than one application. Please note, all applications must be written by the applicant and be distinctively different to other applications supported by the same research group.

Are there any restrictions as to where a secondary supervisor can be based? For instance, can they be based in the UK?

There is no restriction on where the secondary supervisor is based. Institutional norms apply in relation to secondary supervisors. Applicants should outline information about the research group in their application.

Can a supervisor write the application for an applicant, or provide chunks of text to insert into the application?

All applications must be written by the applicant, with guidance from the supervisor. The applicant must declare it is their own unique work and consent to plagiarism checks. For information on Research Integrity, please refer to **clause 13 – RESEARCH INTEGRITY** of the Terms and Conditions.

Is permissible for a prospective applicant to the Irish Research Council Government of Ireland Postgraduate Call to apply with a staff member who has not yet commenced employment in the host institution as their supervisor?

What if the future staff member is employed by another host institution at the time of the application and cannot be registered as a supervisor on the system by the HEI where they will be employed?

Yes, provided that the prospective supervisor concerned will be employed at the host institution, agrees to adhere to the Terms and Conditions of the all and will adhere to institutional norms in term of their ability to commit to supervision of the scholarship for the full duration of the award.

If however, the new staff member cannot be registered by the new institution on the grant management system, SmartSimple, as the Primary Supervisor before the deadline of 7 November 2020, they cannot act as a Primary Supervisor for the application. The applicant can assign the future staff member as a Secondary Supervisor and, if successful, request for a change of Supervisor before beginning the project.

My application falls under a particular Research Area listed under one of the Primary Areas detailed in Appendix I of the Guides for Applicants. However, it does not seem to be available as an option under ‘Disciplines’, after I select the Primary Area. Is it missing from the application form?

Appendix I of Guide for Applicants consists of tables with the different Primary Areas, their relevant Disciplines and a list of Research Areas related to the Discipline. The list of research areas in the Appendix I are a guidance for applicants rather than a limitation to the research areas funded by the Council.

All the Primary Areas and relevant Disciplines available to be selected on the application form match those listed in Appendix I. The choice for disciplines are limited to those listed in the ‘Discipline’ column under each Primary Area in appendix I. The ‘Other research areas’ field, on the other hand, is a free text box, and allows you to choose one or more research areas, including but not limited to those listed in the ‘research areas’ column under each Primary Areas in Appendix I.

4. Conditions of award

Section 8.3 of the T&Cs state that a scholar’s additional duties cannot exceed a total of 50 hours per academic term. Can you please confirm ‘academic term’ refers to an academic semester, as opposed to an academic year?

Clause 8.3 of the Terms and Conditions refers to an academic term or semester.

****Updated****

Can scholars in the first year of their award undertake additional duties, including teaching?

Scholars are eligible to undertake additional duties in the first year of the award provided it is not the first year of the scholar’s PhD or Masters. Where scholars undertake additional duties — including teaching supervision, education provision and support activities —they should be appropriately remunerated by their higher education institution.

****Updated****

Is it possible to delay the start date of the award to March 2022 in order for them to benefit from a full year of IRC funding?

All scholarships must commence on 1 September 2021. It is not possible to defer this start date unless for reasons of maternity leave, paternity leave, adoptive leave, parental leave, prolonged sick leave or carer's leave. Provision of documented evidence will be required if an exception is to be granted.

In April 2020 the Council issued [Guidance](#) for awardees of the Irish Research Council in relation to the COVID-19 crisis. This Guidance includes reference to the deferral of new awards as applicable in 2020 only. This Guidance will be re-visited in 2021 to take improvements and/or changes in the global pandemic and its impacts into account.
