

**Dr Theodor Cojoianu**

***Building Cleantech Finance and Innovation Ecosystems: From Asset Owners to Entrepreneurs***

This project is based in the Michael Smurfit Graduate Business School, University College Dublin. This research, at the intersection between finance, sustainability, and data science, is focused on applying innovative methods to the study of sustainable development issues. The fellow also serves as an Academic-in-Residence in Sustainable Nation Ireland and as an Executive Committee Member on the Global Network on Financial Geography (Fingeo), and he previously held appointments in the sustainable finance space in both academic and finance industry organisations. Having worked in academia within the Centre for Responsible Banking and Finance at the University of St. Andrews, the ICMA Centre at the University of Reading, and the University of Edinburgh Business School, Theodor was previously an analyst with MSCI ESG Research in London and affiliated with Sociovestix Labs and Sustainable Investment Partners. He received his D.Phil. in Geography and the Environment at the University of Oxford and a MSc in Carbon Finance (Distinction) and MEng in Electrical Engineering and Management from the University of Edinburgh.
