

DOROTHY programme 2022

Secondment Hosts

These organisations have indicated an interest in hosting a secondment for DOROTHY fellows where there is alignment between the organisation's mission and the topic of the DOROTHY applicant. Responsibility for proposing/agreeing a commitment with such an organisation rest with the applicant. All fellows will be encouraged to undertake a non-academic secondment, either during the outgoing or the return stage. All non-academic settings (e.g. non-profit, governmental, NGO, industry) will be eligible. Fellows will be able to propose alternative non-academic secondment hosts. Should a secondment not have been envisaged at proposal stage, it can be inserted at a later stage, in agreement with the supervisory panel. Where applicable, reasonable relocation expenses will be treated as eligible research costs. The IRC cannot enter into discussions with applicants on non-academic hosts.
