

**2025 Government of Ireland Postdoctoral Fellowship Programme
Frequently Asked Questions**

FAQs will be published every Thursday until 03 October 2024.

New questions will be marked ****New****

Updated questions will be marked ****Updated****

Questions are grouped under the following headings:

1. Eligibility
2. Applying to the programme
3. Conditions of award

1. Eligibility

The call document states that all applicants must:

- **have been awarded their doctoral degree within the five-year period before 31 May 2025. For the purposes of this condition, the date of graduation will be taken into account;**

Are there any circumstances under which an applicant whose PhD was awarded more than five years ago may be eligible for this programme?

All applicants must have been awarded their doctoral degree between 31 May 2020 and 31 May 2025 to be eligible.

Unless an applicant graduated before 31 May 2020 but has taken an eligible career break. Only career breaks taken by the applicant as a statutory entitlement will be considered eligible. Documented evidence of an eligible career break may be requested from the Irish Research Council at any stage of the application, assessment or award process. Should it become apparent to the Irish Research Council at any stage of the application, assessment or award process that an applicant does not meet the conditions set out herein for adjustment of the period of eligibility or cannot provide documented evidence of same, the Irish Research Council shall be entitled to deem an application ineligible and rescind any offer of award.

Could you please clarify, does an unsubmitted draft for the IRC postdoctoral fellowship count as an unsuccessful application, assuming it is unsubmitted when the call ends?

An unsubmitted draft application would not count as an unsuccessful application.

An applicant has applied twice for the GOIPD call, the first time they were not successful but the second time they were offered a conditional award but couldn't take it up due to personal circumstances. They are enquiring if they can apply this year. The eligibility criteria states that "Applicants must not have had two previous unsuccessful applications to the relevant programme, including to strategic partner themes. This applies regardless of whether the applicant has changed their host institution or research topic since a previous submission" they are now wondering if they are eligible to apply as they were successful in the second attempt.

As the applicant has only had one unsuccessful attempt, they are still eligible to apply. A declined offer does not count as an unsuccessful attempt.

Are retired academics eligible to act as Mentor in the IRC Postdoctoral Fellowship scheme?
Once the Mentor is supported by the HEI and the research office, the IRC would have no objection.
A potential applicant wants to apply for the one-year fellowship aimed at the publication of their PhD thesis. However, they are currently funded by the IRC Enterprise Partner Scheme for their PhD programme. According to the call document, applications will be deemed ineligible if “the research project as proposed in the application form has previously been funded either in full, or in part, by the Irish Research Council or any other funding agency”. Can you please confirm if this rule applies in this circumstance, and the applicant is not in fact eligible to apply for the postdoctoral call?
If the purpose of the application is to prepare a doctoral dissertation for publication through a variety of high quality published academic outputs, e.g., monographs, peer-reviewed articles, edited volumes; etc. following on from their PhD, then this would be considered eligible.
Where someone has taken maternity leave, can you please clarify as to which specific supporting documents the IRC will require as proof of same? Is a letter from the applicant’s institution of employment at the time acceptable, or does the IRC require medical documentation such as a doctor’s note, or a birth certificate?
The IRC will require a letter from the institution of employment at the time. If this cannot be provided, the IRC would also accept a doctor’s note confirming the same. Documented evidence of an eligible career break may be requested from the Irish Research Council at any stage of the application, assessment or award process. Should it become apparent to the Irish Research Council at any stage of the application, assessment or award process that an applicant does not meet the conditions set out herein for adjustment of the period of eligibility or cannot provide documented evidence of same, the Irish Research Council shall be entitled to deem an application ineligible and rescind any offer of award.
Where someone has taken carer’s leave, can you please clarify as to which specific supporting documents the IRC will require as proof of same? Is a medical certificate for the person who required care sufficient? If not, what else will suffice?
The IRC would accept a letter from the institution of employment at the time, confirming the period of carer’s leave. Documented evidence of an eligible career break may be requested from the Irish Research Council at any stage of the application, assessment or award process. Should it become apparent to the Irish Research Council at any stage of the application, assessment or award process that an applicant does not meet the conditions set out herein for adjustment of the period of eligibility or cannot provide documented evidence of same, the Irish Research Council shall be entitled to deem an application ineligible and rescind any offer of award.
In the eligibility quiz, the question is asked: “Will you have been awarded your doctoral degree within the 5-year period before 31 May 2025?”. Where an applicant graduated before 31st May 2020, but has taken sufficient career breaks to retain eligibility, how should they answer this question? It would be untrue to select “yes”.
The applicant may answer “No” to this question and “yes” to the follow-up question “If your PhD graduation date falls before the designated eligibility window (i.e. before 31st May 2020), do you

have a properly documented eligible career break that started before the Call deadline and is at least equivalent to the adjustment being sought? Please note that if you do not provide documented evidence of an eligible career break at least equivalent to the adjustment being sought, your application will be deemed ineligible, withdrawn from the process and any offer of award shall be rescinded.

Under the 'Relevant Work Experience' tab in the application, the applicant can clarify which career breaks they have taken and indicate the duration.

A potential applicant had their PhD graduation in July 2020, which is within the eligibility bracket. However, the date on their graduation certificate is 21 May 2020; the date on which they defended their PhD (10 days outside the eligibility bracket). Can you please confirm if this person can still apply to the call, or does this disqualify them?

If the applicant can provide evidence of their PhD graduation taking place within the eligibility bracket, then the IRC will accept this application assuming the applicant meets all other eligibility criteria as set out in the Call document.

A potential applicant successfully completed their degree in December 2019 but, due to COVID, it was not conferred until July 2021. Are they eligible to apply for a Postdoctoral Fellowship?

As per the Call document, all applicants must have been awarded their doctoral degree within the five-year period before 31 May 2025. For the purposes of this condition, the date of graduation will be taken into account. Applicants must not have been employed as a postdoctoral researcher for more than five years as at 31 May 2025.

Is it no longer a requirement that applicants must carry out their postdoc research at a different host organisation and with a different mentor, than those with which they completed their PhD preparation?

The applicant's choice of mentor and host organisation is entirely at their own discretion but must be appropriately justified as part of the application. While the research mobility requirement has been removed, assessors must be convinced that the mentor and host organisation are the ideal situation for the placement of the applicant and project. Please consult the *General Application Feedback* document for further information.

Is it possible for the Irish Research Council to award funding to a project in the area of fossil fuel research that examines improving fuel injector efficiency in heavy engines/turbines and that could eventually lead to improved environmental sustainability?

Yes, such an area of research can be funded.

Please note that as per the Call Document, the Irish Research Council is not in a position to award funding for research activity under any of the following prohibited areas:

- human cloning for reproductive purposes;

- genetic modification of human beings that could make such changes heritable (with the exception of research relating to cancer treatment of the gonads, which may be funded); or
- creation of human embryos solely for the purpose of research or for the purpose of stem cell procurement, including by means of somatic cell nuclear transfer.

Can an applicant apply for the Postdoctoral Fellowship programme if they had two previous unsuccessful applications to the Postgraduate Scholarship program?

Yes, an applicant is eligible to apply for the Postdoctoral Fellowship even if they had been previously unsuccessful to the Postgraduate Scholarships.

A potential applicant has created two previous applications in the on-line system – one unsuccessful and one ineligible. As the ineligible application did not reach the review stage, could you confirm that this applicant can apply again this year?

As per the Call Document, applicants must not have had two previous unsuccessful applications to the relevant programme. An ineligible application does not count as an unsuccessful attempt. As the applicant has only had one unsuccessful attempt, they are still eligible to apply.

Is a permanent member of staff at a higher education institution/research-performing organisation, who is a non-academic/non-research staff member, e.g. a coordinator for administrative matters, eligible to apply?

As per the Call document, *Applicants must not be a permanent member of staff in either an Irish or international higher education institution or research-performing organisation.*

A potential applicant who graduated with their doctorate in November 2020 is employed at a HEI with a contract of indefinite duration as a postdoc, they are not permanent, are they still eligible to apply?

As per the Call document, *Applicants must not be a permanent member of staff in either an Irish or international higher education institution or research-performing organisation.*

If an applicant is not a permanent member of staff at a HEI, they are eligible to apply for the Postdoctoral Fellowship, as long as they have been awarded their doctoral degree within the allowable period of eligibility, as outlined in the Call Document (please see section 7.2.1) and meet all other eligibility criteria as set out in the Call document.

An applicant is entitled to EU citizenship and has applied for it. They are expected to receive their EU citizenship between February and July 2025. Is it acceptable for the applicant to answer 'yes' to the question 'national of EU member state'?

Solely nationals of an EU member state should select “yes” to the query “*Are you a national of a European Union member state (including the Republic of Ireland) OR Iceland, Norway, Liechtenstein, Switzerland, or the United Kingdom?*”

Should the application progress to the second stage of assessment (remote evaluation to an outer international assessment board), and the applicant be granted EU citizenship before the call outcome in April 2025, they must notify the IRC by contacting postdoc@research.ie

An applicant has dual nationality, one non-EU and one EU. Is it appropriate for the applicant to register in the online system with their non-EU nationality, and then answer yes to the question “*Are you a national of a European Union member state (including the Republic of Ireland) OR Iceland, Norway, Liechtenstein, Switzerland, or the United Kingdom?*”

The answer to the query “*Are you a national of a European Union member state (including the Republic of Ireland) OR Iceland, Norway, Liechtenstein, Switzerland, or the United Kingdom?*” must match the nationality registered on the system.

2. Applying to the programme

Can an applicant include a monograph and edited collection both under contract in the publications and research outputs section of the application?

Yes, an applicant can include a monograph and edited collection both under contract in this section.

This is in relation to the following: “*Please describe your research achievements since beginning your career as a researcher (including PhD and post-PhD, if applicable). Please bear in mind this could be read by non-specialists, as well as peers, and should be written in order to communicate with them effectively.*” Some applicants have given a bullet point list of journal articles, impact factors, etc. but, because this could be read by non-specialists, are you looking for a more DORA style narrative here?

The IRC does not have a recommended style to answer this section of the application. For more insight into what the assessors look for in applications please see the *General-Application-Feedback* document under the FAQs section of the [website](#).

Can a research fellow, employed at the host institution, act as the mentor?

No, postdoctoral fellows must be mentored by suitably qualified and experienced members of academic staff at the institution.

I wish to confirm, that it is not possible to have a secondary mentor named in a specific section of a postdoctoral application form (although it is possible to write them in for training for specific tasks and career development)?

This is correct. It is not possible to have a secondary mentor in a postdoctoral application although it is possible to acknowledge them for training for specific tasks and career development.

Reference forms are no longer required, but is it possible to upload letters of recommendation as part of the application?

No, there is no possibility of uploading reference materials for an application. Letters of recommendation must not be included in any other section of the application.

Please note that as per the Call Document, section 8, an application that includes additional materials other than those requested will be deemed ineligible.

The wording in the application seems to suggest that a GANTT chart is mandatory, but any other supplementary information is optional. Could you clarify whether the GANTT chart is in fact mandatory?

GANTT charts are not compulsory and applicants can submit their application without including one.

Please note that we recommend applicants to review the “General Application Feedback” document before applying.

Can I put a book review essay (review of an academic book) published in an academic journal in the peer-reviewed publications section?

Unless the book review essay has been peer-reviewed by the academic journal, it should be listed in the ‘Other Publications and Research Output’ section of the application.

I want to apply for a GOIPD fellowship, but I don’t think I have any new skills to learn. Will my score be penalised?

As per the Call Document, appendix 7, the ‘Capacity to acquire new knowledge’ is included as an evaluation criterion under the ‘Training and Career Development’ section of the proposal.

As per the General Application Feedback document, assessors indicate that *‘The best plans are those that show an understanding of the applicant’s skills gaps and how they will be filled’* and that *‘For applications at any stage, it is useful to identify formal training (courses, workshops, placements etc)’*. Also, as per the General Application Feedback document, assessors also recommend that applicants should *‘Consider whether the training opportunities are being used to extend the applicant’s abilities for social engagement and for developing influential research impacts’* and *‘Consider wider skill sets beyond the practical aspects of research work, including management, administrative, leadership, and teaching skills’*. The General Application Feedback document state that assessors consider that *‘The best career development plans linked the skills the applicant already had to those they would gain because of the fellowship. These plans showed how the award of the fellowship would transform current skills into those the applicant had identified as being required to pursue their chosen career. It is important that the skills, career progression, etc., are*

linked specifically to the opportunities because of the fellowship and not just because of a generic postdoc position’.

Regarding the evidence required to demonstrate a career break that is mentioned in section 7.2.4., in what section of the application should this be produced/uploaded?

Eligible career breaks may be indicated in the ‘**Relevant Work Experience**’ section of the application. At the end of this section, there is a heading ‘*Breaks in Research Career Path*’ with the question ‘*Do you require an extension to this 5-year period on grounds of a career break?*’

If the applicant has an eligible, documented career break (please see section 7 of the Call document), they may answer ‘Yes’ to this question, another section of the form will appear where the appropriate eligible career break may be selected, and the relevant dates of the break recorded.

Applicants are asked not to upload supporting documentation in relation to eligible career breaks. Documented evidence of an eligible career break may be requested from the Irish Research Council at any stage of the application, assessment or award process. Should it become apparent to the Irish Research Council at any stage of the application, assessment or award process that an applicant does not meet the conditions set out herein for adjustment of the period of eligibility or cannot provide documented evidence of same, the Irish Research Council shall be entitled to deem an application ineligible and rescind any offer of award.

The Call document states that ‘Applicants must not have been employed as a postdoctoral researcher for more than five years as at 31 May 2025.’ AND ‘An applicant’s eligibility may be adjusted as a result of any properly documented eligible career break, provided the grounds for the adjustment started before the call deadline.’

The applicant began employment as a postdoctoral researcher 5 years prior to 31 May 2025 but, during this time, had an eligible documented career break of 8.5 months such that the time employed as a postdoctoral researcher will be less than 5 years at 31 May 2025. Is the applicant eligible?

An applicant’s period of eligibility may be adjusted as a result of any properly documented eligible career break, provided the grounds for the extension started before the call deadline. Eligible career breaks include maternity leave, paternity leave, adoptive leave, parental leave, parent’s leave, extended sick leave and carer’s leave. Only career breaks taken by the applicant as a statutory entitlement will be considered eligible. Career breaks explained by working outside of academia or by being unemployed for a period of time will not be considered as valid reasons to extend the eligibility window.

Documented evidence of an eligible career break may be requested from the Irish Research Council at any stage of the application, assessment or award process. Should it become apparent to the Irish Research Council at any stage of the application, assessment or award process that an applicant does not meet the conditions set out herein for adjustment of the period of eligibility or cannot provide documented evidence of same, the Irish Research Council shall be entitled to deem an application ineligible and rescind any offer of award.

A potential applicant is associated with this university as a visitor with the title ‘Adjunct Assistant Professor’. They do not have a contract with the university nor a salary. Can you confirm that they are eligible to apply for a fellowship?

An applicant is eligible to apply for a Postdoctoral fellowship as long as they are not a permanent member of staff in either an Irish or international higher education institution or research-performing organisation, and as long as they have been awarded their doctoral degree within the allowable period of eligibility, as outlined in the Call Document (please see section 7.2.1) and meet all other eligibility criteria as set out in the Call document.

The applicant’s PhD thesis title and abstract are requested in the form. If an applicant is in the final year of their PhD and aims to submit the hardbound copy of their thesis before 31 May 2025 (as part of their application for the postdoc fellowship), would it be a problem if their PhD title or abstract changes after their viva/corrections and ends up being different in the hardbound thesis?

No, if the title or abstract is edited as a result of corrections imposed at the Viva this would not render the application ineligible. Applicants should notify the IRC of such edits at the outcome stage of the process (April 2025).

Is it acceptable to explicitly write the name of the mentor (and a potential second mentor) on the form when indicating career and development plans? Or, should the applicant refer to their mentor simply as ‘the mentor’ in the form for anonymity purposes?

Yes, applicants may include the name of the mentor and a second mentor on the form when indicating career and development plans.

Is it necessary to upload a peer-reviewed publication to the application?

No, this it is not necessary as details of the publication should be included in the *Publications and Research Outputs* section of the form.

Do poster presentations at research conferences count as other research outputs? Would it be meaningful to provide details of the poster abstracts (not conference papers but posters only) on the form?

Yes, these may be referenced in the research outputs section of the form. Details considered pertinent by the applicant may be outlined in the *‘More Details’* section of the form.

In the section on academic qualifications, there is space for 3 research awards, numbered 1, 2, and 3. Can more awards be added, or is this section limited to 3 awards only?

In the *Academic Qualifications* section of the online application, there is also a free text box *‘Research Achievements’*:

** Please describe your research achievements since beginning a career as a researcher (including PhD and post-PhD, if applicable). Please bear in mind this could be read by non-specialists, as well as peers, and should be written in order to communicate with them effectively:*

Details of research awards not listed in *Research Award 1, 2 and 3* may be included here.

An applicant has a paper that has been "accepted with minor revisions", however, the revisions have not been completed. Which section would be most appropriate to include this potential publication?

Please note that publications *in press* can, but publications *submitted* and *in preparation* strictly cannot, be included in the section '*Other Publications and Research Outputs*'.

In the *Academic Qualifications* section of the online application, there is also a free text box '*Research Achievements*':

** Please describe your research achievements since beginning a career as a researcher (including PhD and post-PhD, if applicable). Please bear in mind this could be read by non-specialists, as well as peers, and should be written in order to communicate with them effectively:*

Publications that cannot be included in '*Other Publications and Research Outputs*' may be included here.

3. Conditions of award

Can an applicant apply to the Government of Ireland Postdoctoral fellowship Programme and submit the same project to the Enterprise Partnership Scheme (Postdoctoral Fellowship)?

Yes, an applicant can apply for both the Government of Ireland Postdoctoral Fellowship Programme and the Enterprise Partnership Scheme (Postdoctoral Fellowship). If successful in both programmes, an applicant can only accept one of the fellowships.

Can a potential applicant use the €5k for research expenses to hire a research assistant on a casual basis to assist with screening of literature and management of focus groups, and to pay for some travel involved?

No, the award is made to the individual awardee and the awardee's duty is to the successful completion of the research project for which they have been awarded Irish Research Council funding. Awardees are required to engage in full-time research in their host institution during the funding term to develop the stated research project and training and career development plan. It is not possible to 'transfer' funding to another recipient. Permitted costs include: materials and consumables; equipment; software and hardware critical for the proposed research; pay-as-you-go access to national research infrastructures; archival research costs; reasonable travel, subsistence, and conference costs; skills training directly related to the objective(s) of the award; publishing and write-up costs; and reasonable travel and refreshment costs for subjects and volunteers in studies.

Is there any impact or effect on the assessment of applications should a potential mentor be supporting for example four or multiple applicants?

As per the Call document, while a mentor at an Irish host institution is permitted to support more than one award holder under the programme, this should not be used as a means for academic mentors to form research teams. Each application must be in support of an individual and original project, written by the applicant and distinctively different to other applications which may be received under the same mentor. Applications that do not meet this requirement may be deemed ineligible at any stage of the process. The Irish Research Council reserves the right to request additional detail from the mentor outlining how these new awards will be integrated into the mentor's current activities, as well as the planned time management of each individual's research programme and career development plan.
